

# Attestation

## E1-1271

Herewith it is confirmed that in the second half of 2022, performed on 07.12.2022, a regular supervision of the product

### BisonBord Supreme

particleboard, urea - formaldehyde (UF), unfaced  
in the thickness range:  $> 12 \leq 25$  mm

manufactured by

**Piet Retief Board Plant / PG Bison  
Farm Voegveld, Kemp Siding  
2380 Piet Retief  
South Africa**

was carried out by the approved supervision body (NDS08)

### Fraunhofer Institute for Wood Research

Wilhelm-Klauditz-Institut WKI  
Bienroder Weg 54E, 38108 Braunschweig, Germany

according to supervision contract no. 1271 dated December 10, 2018. It was found that the requirements on personal and equipment are suitable to produce the product in an adequate way and the factory production control meets the requirements of the "Regulation on the classification and external supervision of wood-based panels regarding formaldehyde emission (DIBt - Guideline 100)" dated June 1994. This attestation is part of the evaluation report. The continuous external supervision of factory production control shall take place twice a year.

**Dipl.-Ing. Harald Schwab**

Head of the Testing, Supervision  
and Certifying Body

**Braunschweig, March 8, 2023**
