

FORMICA LIFESEAL WORKTOPS

POST FORMED WORKTOP

TECHNICAL DATA SHEET

BRAND NAME	Formica LifeSeal Worktops
GENERIC NAME	Post formed worktops
PRODUCT DEFINITION	A composite panel consisting of a Formica laminate rated Horizontal Grade Post Forming (HGP) bonded to a medium density fibreboard (MDF) substrate with a suitable backer. One or two long edges are post formed to specified radii.
COMPOSITION	A) Formica laminate HGP of 0.5mm to 0.8mm thickness and of specified décor colour and surface finish B) 22mm SupaWood MDF substrate C) Polyvinyl Acetate (PVA) D) Balancing backer
SPECIFICATIONS	Formica laminate HGP to SANS 4586 SupaWood MDF substrate to SANS 540-1 Composite Board to SANS 929
ATTRIBUTES	• Pre-finished decorative surface with good resistance to mechanical, chemical, heat and environmental damage in domestic applications • Closed melamine surface provides moisture resistance and makes it easy to clean, stain resistant and hygienic • LifeSeal strip gives added protection against moisture ingress at the point where the laminate meets the backer • Available in wide range of designs • Low maintenance surface • Ease of fabrication and installation with traditional woodworking tools • Cut-outs, back and exposed edges must be sealed for longevity
APPLICATIONS	Interior, horizontal, medium to heavy-duty worktop application in domestic, office, retail and hospitality industries. Primarily used for kitchen worktops.
